## EXAMINER'S AMENDMENT Andt/PMP

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows: in figure 3, should added the reference sign (42) "mirror structure 42", as mentioned in the description page 5, line 7.

The following changes to the drawings have been approved by the examiner and agreed upon by applicant: in figure 3, added the reference sign (42). In order to avoid abandonment of the application, applicant must make these above agreed upon drawing changes.

## **REASON FOR ALLOWANCE**

2. The following is an examiner's statement of reasons for allowance: the claims are allowable over prior art of record, because none of the references in alone or in combination disclose: an array of movable MEMS mirror devices having a high linear mirror fill factor, comprising:

irror illi idotor, comprising.

- a base structure; and

- a plurality of selectively movable mirror structures, each being pivotally supported by a flexure connected to said base structure, and <u>each mirror</u> structure having a reflective surface portion.

the reflective surface portions of the mirror structures being arranged in close proximity to each other and in generally linear alignment forming a row structure, with the flexures supporting adjacent mirror structures being staggered on opposite sides of said row structure.

The underline limitations are disclosed in all independent claims 1, 18, 36, 53, 66, 78, 82, 100, and 117. This limitation is critically, since the MEMS mirror arrays increased linear mirror fill factor include greater mirror surface coverage and reduced optical loss in the same linear space, therefore switch performance is improved.

The Kane et al. (6,681,063) is the closest reference, discloses a MEMS mirror array, each mirror having a reflective surface structure (6), but these reflective surface of the mirror structures arranged are not close to each other, they separate by space of actuators (1a).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

## **CONTACT INFORMATION**

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to PHAN T.H. PALMER whose telephone number is (571) 272-2354. The examiner can normally be reached on 4/4 OFF MONDAY.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, RODNEY B. BOVERNICK can be reached on (571) 272-2344. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
